25X1

1. In April 1952, the RFT Elektro-Mechanische Werkstaetten (Electrical-Mechanical Workshops), Dabendorf, completed 150 SFA 1-52 naval radio installations for the Ministry of Post and Telecommunications. When one of the installations was inspected prior to acceptance, however, various defects were found, and the Ministry refused to accept the order until the defects had been corrected. The equipment is ultimately to be installed on cutters and luggers, replacing that currently being used which was built in 1951 and is unsatisfactory because of considerable frequency variations. Larger power plants are also scheduled to be installed on trawlers.
2. Prior to July 1952, the Dabendorf shops completed 14 of the LWE m 10 long-wave receivers of very low frequency which had been developed by Funkwerk Koepenick. The receivers were to be delivered as reparations. Ten sets are scheduled for completion in 1953, in accordance with acceptance conditions set by the Beelitz radio receiving station.
